

Notes from the City Administrator:

Regarding the potential "Cost to Repair" the ambulance (VIN 1FDUF4HT7CEC34659) which suffered a catastrophic Fuel Injection System Failure, the following quotes were garnered from 4 different potential repair vendors.

1. **Delta's East Side Auto-Repair** Quote includes call out to recover but does not include relocation to the Public Works building. \$13,948.56
2. **Seekins Ford**-Quote is an approximation and was verbal only. They are sending the City a more in-depth quote within the next week. In addition, a repair by Seekins would include a 2-year warranty on parts. Expected completion time is 3 to 6 months best case. \$16,000
3. **Parsons Truck and Auto Repair** verbally provided a quote and also expressed disinterest in taking on the repair. \$15,000 - \$20,000.
4. **H & H Service Center** offered a minimum quote of \$10,000 but said that it would likely be more and it would require the vehicle to be onsite for further evaluation.

The general consensus would be that all repairs would likely average around the \$15,000 dollar mark and would also include a very long wait period due to the unavailability of the specific parts required.
