Re: Work session with Delta Medical Transport/EMS Services

Now that Council has had a bit of time to think regarding all that Delta Medical Transport told us about current emergency medical services and the finance situation:

- Are there any additional questions that Council would like information on?
- What does the Council want us to do regarding this? The current contract goes until June 30, 2022. Tony and Amber want to start negotiation in April.
- What approach does Council want to take? Doing a request for proposal? Figuring where money could come from to increase what the City pays to Delta Medical Transport? Some combination of the two?
